

Remarks Continued

ball mount member 17. The indexing function in Griffith is provided by "a pair of arms 21" and "hooks 27". Neither Griffith alone nor in combination show the dual function structure now recited in claim 9. Further it is submitted the simplified dual purpose structure of applicant's claim 9 is not obvious over Griffith in view of Szczpski or any of the other art known to applicant.

Claim 10 has been rewritten as claim 14 incorporating all of the limitations of claim 9 with those of original claim 10.

The informalities noted having been corrected it is believed as indicted by the Examiner, that claims 1-3, 11, and 14 are now allowable. Allowance of claim 8 and amended claim 9 is also believed in order. Claims 4-7, 12, and 13 are withdrawn.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Robert O. Wright". The signature is fluid and cursive, with a large initial "R" and "W".

Robert O. Wright

Attorney for Applicant
